

Anticon® Gold Sorb™ Wipes

100% polyester wipe, blend of standard and microfiber filaments with sealed edges

Anticon® Gold Sorb™ is a unique wipe which combines the performance of a microfiber yarn with that of a polyester yarn to create a wipe with superior wiping and sorptive characteristics. The proprietary sealed edges of these wipes allow the use of 100% of the wipe for cleaning without the worry of harming delicate surfaces. Anticon Gold Sorb wipes have no abrasive borders, making them particularly suitable for cleaning sensitive components such as optics.

Anticon Gold Sorb is available validated sterile. It is sterilized via gamma irradiation, and a certificate of irradiation is provided with each shipment. Anticon Sterile Gold Sorb is suitable for use in critical pharmaceutical environments.
